Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Examiner regrets the untimely reopening of prosecution.
2. The rejection of claims 1-6 and 9-10 under 35 U.S.C. 102(b) as being anticipated by Bringley et al., U.S. Patent Number 5,523,558 is withdrawn due to applicant's arguments.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6 and 9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 0234385.

The European reference discloses a radiation image storage panel comprising a support and a phosphor layer provided on the support, which comprises a binder and stimuable phosphor dispersed therein as per instant claims 1 and 9-10 (see page 2). Additionally, the reference discloses that the phosphor layer contains a compound having a metal salt of an organic acid wherein the organic acid can be salicylic acid (aryl carboxylic) as per instant claims 1 and 2 (see page 5). Example 13 of the reference discloses that polyurethane resin can be used as the binder as per instant 3-6. Claims 9 and 10 are product-by-process claims. Even though product-by-process claims are limited and defined by the process, determination of patentability is based on

Art Unit: 1774

the product itself. The patentability of a product does not depend on its methods of production. If the product in the product-by-process claims is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior art was made by a different process. See MPEP 2113. The radiographic phosphor panel of the European reference is the same as the radiation image conversion panel of the instantly claimed invention. Both the European reference and applicant have a radiation image panel comprising a phosphor layer. The manner in which applicant forms the phosphor layer does not make the panel different from the panel in the European reference.

Response to Arguments

5. Applicant's arguments with respect to claims 1-6 and 9-10 have been considered but are moot in view of the new ground(s) of rejection.
